

M-Service 3500

Safe and efficient work at height

Move swiftly, safely and silently through the greenhouse, effortlessly switching path without dismounting or performing extra actions, all with a maximum platform height of 3.5 metres. The M-Service 3500 sets a new standard in this area. Its narrow scissor design makes it perfect for tasks at height, such as maintenance, scouting and crop care.

What makes Metazet's M-Service 3500 unique?

- ✓ **Controlled upward and downward movements:** motor-controlled hydraulics ensure safe, fluid movements.
- ✓ **Efficient on paths and tube rails:** effortlessly navigates concrete paths and tube rails without the need to dismount.
- ✓ **Platform height up to 3.5 metres:** suitable for various tasks at height in greenhouses.
- ✓ **Exceptional manoeuvrability:** compact design with a small turning radius for easy navigation.
- ✓ **Comfortable and ergonomic:** low step-in height and user-friendly operation with a steering wheel.
- ✓ **Crop protection:** narrow scissors reduce the risk of crop damage.
- ✓ **Long-lasting performance:** durable lithium battery pack that lasts a full workday on a single charge.
- ✓ **Stable handling:** differential steering function ensures stability and traction on both concrete paths and tube rails.

Efficiency and safety as standard

In the fast-paced environment of horticulture, speed and precision are essential. The M-Service 3500 increases efficiency by enabling workers to perform tasks at height more quickly and with less effort. Its controlled scissor movements and smooth operation significantly reduce the risk of unsafe situations.

Experience the difference!
